SECTION 4 : FIRST AID MEASURES

Catalog No. 10455

Eye Contact:	Immediately flush eyes with plenty of water for at least 20 minutes. Assure adequate flushing of the eyes by separating the eyelids with fingers. Get immediate medical attention if irritation persists, or symptoms of overexposure become apparent.
Skin Contact:	Immediately wash skin with plenty of water for at least 20 minutes, while removing contaminated clothing and shoes. Get medical attention especially, if irritation develops, persists, or symptoms of overexposure become apparent.
Inhalation:	Remove to fresh air. If not breathing, give artificial respiration or give oxygen by trained personnel. Keep warm. Get immediate medical attention.
Ingestion:	If swallowed, call a physician or poison control center immediately. Never give anything by mouth to an unconscious person. Do not induce vomiting unless instructed by medical personnel. Get medical attention.

SECTION 5 : FIRE FIGHTING MEASURES

Catalog No. 10455

Flash Point:	No data
Extinguishing Media:	Use dry powder or carbon dioxide when fighting a fire involving this material.
Unsuitable Media:	Water extinguishers are not recommended.
Protective Equipment:	As in any fire, wear self-contained breathing apparatus pressure-demand, NIOSH (approved or equivalent) and full protective gear.

SECTION 6 : ACCIDENTAL RELEASE MEASURES

Catalog No. 10455

Personal Precautions:	Use proper personal protective equipment as listed in section 8.
Spill Cleanup Measures:	Clean up spills immediately, observing precautions in the Protective Equipment section. Sweep up, then place into a suitable container for disposal. Refer to section 13 for disposal requirements.
Environmental Precautions:	Do not allow material to enter drains or streams.

SECTION 7 : HANDLING and STORAGE

Catalog No. 10455

Handling:	This product should be handled only by, or under the close supervision of, those properly qualified in the handling and use of potentially hazardous chemicals, who should take into account the fire, health and chemical hazard data. It should always be handled in an efficient fume hood or equivalent system. The user should consider that the toxicological and physiological properties of many compounds are not yet well determined and that new hazardous products may arise from reactions between chemicals. Care should be taken to prevent any chemical from coming into contact with the skin or eyes and from contaminating personal clothing.
Storage:	Store in a cool, dry, well ventilated area away from sources of heat and incompatible substances. Keep container tightly closed when not in use.
Hygiene Practices:	Wash thoroughly after handling. Avoid contact with eyes and skin. Avoid inhaling dust.

SECTION 8 : EXPOSURE CONTROLS, PERSONAL PROTECTIONCatalog No. 10455

Engineering Controls:	Use appropriate engineering control such as process enclosures, local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits. Where such systems are not effective wear suitable personal protective equipment, which performs satisfactorily and meets OSHA or other recognized standards. Consult with local procedures for selection, training, inspection and maintenance of the personal protective equipment.
Skin Protection Description:	Wear suitable protective clothing to prevent contact with skin.
Hand Protection Description:	Wear appropriate protective gloves. Consult glove manufacturers for glove permeability data.
Eye/Face Protection:	Wear appropriate protective glasses or splash goggles as described by 29 CFR 1910.133, OSHA eye and face protection regulation, or the European standard EN 166.
Respiratory Protection:	A NIOSH approved air-purifying respirator with an appropriate cartridge or canister may be permissible under certain circumstances where airborne concentrations are expected to exceed exposure limits. Protection provided by air purifying respirators is limited to airborne concentrations that are typically within 10 times the exposure limit. Use a positive pressure air supplied respirator if there is any potential for an uncontrolled release, exposure levels are not known, or any other circumstances where air-purifying respirators may not provide adequate protection. A respiratory protection program that meets OSHAs 29 CFR 1910.134 and ANSI Z88.2 requirements must be followed whenever workplace conditions warrant a respirators use.
Other Protective:	Facilities storing or utilizing this material should be equipped with an eyewash facility and a safety shower.

SECTION 9 : PHYSICAL and CHEMICAL PROPERTIESCatalog No. 10455

Physical State/Appearance:	Solid
Color:	Brown
pH:	3 (10 g/L @ 20°C (68°F))
Flash Point:	No data
Boiling Point:	No data
Melting Point:	ca. 290°C (554°F)
Solubility in Water:	ca 150 g/L @ 25°C (77°F)
Density:	No data
Molecular Formula:	C ₃₇ H ₃₄ N ₂ Na ₂ O ₁₀ S ₃
Molecular Weight:	808.86

SECTION 10 : STABILITY and REACTIVITYCatalog No. 10455

Conditions to Avoid:	Heat, flames and sparks.
Incompatibilities with Other Materials:	Oxidizing agents.
Possible Decomposition Product:	Carbon monoxide. Sulphur dioxide.

SECTION 11 : TOXICOLOGICAL INFORMATIONCatalog No. 10455

[Fast Green FCF :](#)

RTECS Number:	BQ4425000
Eye Effect:	No data reported in the cited references as of the revision date.
Skin Effects:	No data reported in the cited references as of the revision date.
Ingestion Effects:	Oral - rat LD50: >2 gm/kg (RTECS)
Inhalation Effects:	No data reported in the cited references as of the revision date.
Carcinogenicity:	Tumorigenic - neoplastic by RTECS criteria.
Mutagenicity:	Mutation data reported. (RTECS).

[To Top of page](#)

Ecotoxicity:	No information provided.
Bioaccumulation:	No information provided.
Biodegradation:	No information provided.
Environmental Stability:	No information provided.
